

New Technology Seminar and Exhibition

Thursday 5th November 2026

The Geological Society, Burlington House, London

Call for Abstracts & Exhibitors

Submission Deadline: Friday 23rd October 2026

On **Thursday 5th November** the London Petrophysical Society will be holding a **hybrid seminar and exhibition on New Technology** at the **Geological Society, London**.

This will include an exhibition in the library where those keen to demonstrate their new technology will have the opportunity to host a stand. The associated cost of hosting a stand will be £250 – please email j.hansford@rogii.com if you are interested.

It will consist of a series of presentations, showcasing petrophysical and formation evaluation technologies that are new to the industry, each lasting around 25mins with some time for Q&A.

We are looking for talks on new technologies on any petrophysical theme, for example:

MWD/LWD	Digital Rocks
Mudlogging	Machine Learning/Big Data
Wireline	Case studies using petrophysical
Surveillance	technology
Coring/core analysis	Any other Petrophysical technology

This is a **Call for Abstracts** for presentations from Energy Companies, Service Companies, Independent Consultants, Academia and other interested parties.

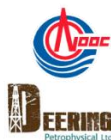

Abstracts should be one page of A4 including an illustration and speaker bio, submitted in Word Document format.

Please send your abstracts to Joanna Hansford, j.hansford@rogii.com, or any member of the LPS Committee, by Friday 23rd October 2026. Note there is a strong preference for speakers to present in person.

This seminar is FREE to attend! Please forward to anyone who may be interested!

Includes lunch and post-seminar wine and savouries
